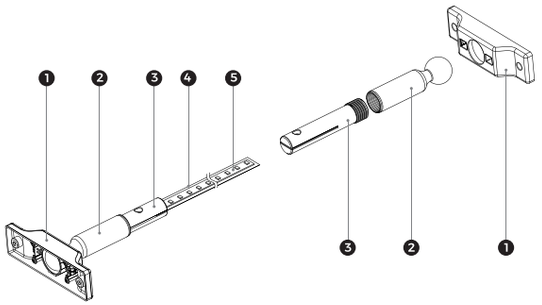
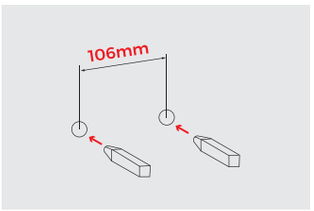
Material List

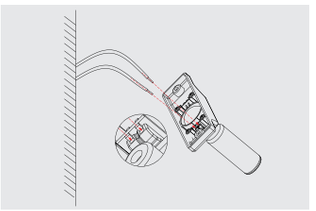


1. bottom box * 2
2. rotary rod * 2
3. screw rod * 2
4. steel strip * 1
5. LED strip * 1
6. scissors * 1
7. wire rope * 1
8. LED strip installer * 1
9. slip-proof glove * 1
10. marker * 1
11. M3.5*40 screws kit * 4
12. wrench * 1

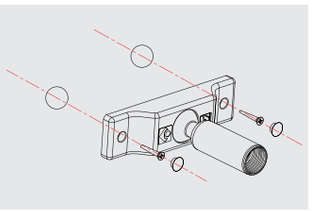
Installation procedure



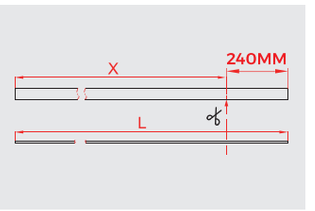
1 On the installation wall, drill two ϕ10mm holes with a distance of 106 mm, and install the cork.



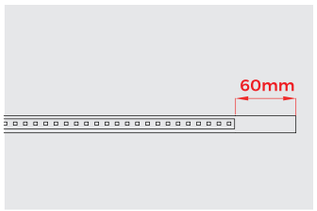
2 Connect the DC24V wire to the terminal of the bottom box. The wire is recommended to be 16AWG single copper wire.



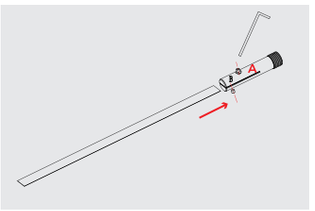
3 Put the rotary rod through the bottom box, and fix the bottom box onto the wall. Please fix the rotary rod marked A to the bottom box with terminals.



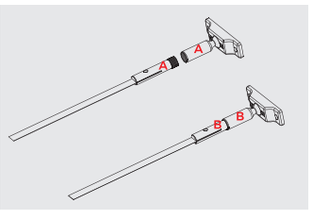
4 Measure the distance(L) between the installation walls with wire rope, and the cutting length(X) of the steel strip should be 240mm shorter than L.



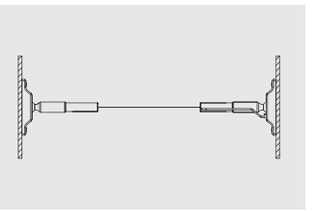
5 Paste the LED strip on the steel strip, the beginning position should be 60mm away from one end of the steel strip.



6 Fix the steel strip to the screw rod. The steel strip which side with a quick plug terminal should be fixed to the screw rod marked A.



7 Fix the screw rod with the rotary rod. Tighten the steel strip by turning the rotary rod.



8 Plug the quick plug terminal into the bottom box.
